A DURAVANT COMPANY

Adapt. Respond. Deliver.

It's the Company Behind the Machine that Makes a Difference.

Recognized as the leader in fluid truck loading and unloading material handling solutions, FMH Conveyors manufactures, installs and services a complete range of custom engineered and designed conveyors for applications in distribution, manufacturing, assembly, and packaging operations.

Our NestaFlex, MaxxReach, BestFlex, BestReach and BestConnect brands are known throughout the industry for their superior design and functionality. Our products are built to deliver lasting conveyor performance in punishing conditions often associated with shipping and receiving.

We take pride in providing our customers the right product for their application. We go beyond the details of the initial specifications to correctly identify the equipment solution for their application. Through our years of expertise and leadership in the material handling industry, we have developed a knowledgeable and highly-skilled team.

FMH Conveyors delivers exemplary customer service by providing 24/7 technical support. Whether you need a part shipped or a technician to arrive on-site, we promise to take care of you right away. FMH Conveyors is a Duravant Company.

NESTAFLEX® **MAXXREACH**® **BESTCONNECT**™

BESTFLEX™ **BESTREACH**™

NestaFlex is a well-known brand throughout the material handling industry. It stands for superior design and functionality allowing complete portability, expansion, contraction, and flexibility. These gravity conveyors are designed to improve shipping, transportation, and packaging efficiency in retail store receiving, distribution center shipping and packaging applications.

NestaFlex 200 Roller Conveyors

A light-medium duty, flexible gravity conveyor specifically designed to handle odd shaped boxes, bags, drums, and pails in low to medium volume applications.

NestaFlex Light-Medium Duty 226 Skate Wheel Conveyors

A general purpose light-medium duty, gravity conveyor designed to handle multi-sized packages in low to medium volume applications.

NestaFlex Heavy Duty 376AL/FL Skate Wheel Conveyors

A heavy duty gravity conveyor sturdy enough to handle large packages in high volume applications. The adjustable leg (AL) conveyor requires hand knobs to set the desired height, while the fixed leg (FL) is preset by set screws based on application.

NestaFlex Heavy Duty 376PL Skate Wheel Conveyors

The leading expandable gravity conveyor for high volume shipping needs equipped with several engineered options including guide track, herringbone transition, and power assist to enhance ergonomics and productivity.

DEVELOPERS
OF INNOVATIVE
SOLUTIONS

BestFlex is recognized throughout the world as the brand that saves time, reduces labor costs, and increases overall efficiencies in a wide range of shipping, receiving and manual sortation applications. BestFlex power conveyors provide the same function and versatility as gravity systems, but with the benefit of powered rollers. Flexible powered conveyors move various package sizes any distance at variable rates of speed. They provide maximum productivity in shipping, receiving and packaging applications where usability and adaptability are needed.

BestFlex 1.9 Flexible Power Conveyors

Similar in functionality to the BestFlex 1.5 power series, these conveyors are designed with stronger components. Upgrades include 1.9" diameter steel rollers, 8" x 2" casters, and 2" aluminum side plates. They are engineered to withstand heavy duty applications in distribution centers and warehouses.

BestFlex 1.5 Flexible Power Conveyors

The BestFlex 1.5 power conveyors offer consistency and quality in shipping or receiving hundreds to thousands of packages a day. Manufactured with 16-gauge precision bearing 1.5" diameter steel rollers, 6" x 2" heavy duty casters with brakes, and 1.59" aluminum extruded side plates, these conveyors are high performers in distribution centers and warehouses.

MaxxReach has a long history of supplying the material handling industry with high volume loading and unloading solutions. With multiple options and diverse capabilities, operators can customize this conveyor to meet specific application needs. Our state-of-the-art engineered design incorporates quality, ergonomics and safety into each order. The MaxxReach telescopic conveyor provides the highest level of productivity for large volume shipping and receiving applications in distribution centers.

MaxxReach Telescopic Conveyors

MaxxReach telescopic conveyors are uniquely designed for each customer. We spend the time needed to fully understand the application, so our design is the perfect solution for your needs.

DESIGNERS,
MAKERS, AND
MAINTAINERS
OF HIGHLY
ENGINEERED
MATERIAL
HANDLING
EQUIPMENT

BestReach is an established brand with a long-standing reputation for quality and reliability. These rigid conveyor systems offer the highest level of ergonomic benefits and safety controls available in the industry. They are built tough to handle heavy volume and high impact shipping applications that run multiple shifts throughout the day. The belt drive-out conveyors provide complete product control with the reliability of a continuous belt surface while the roller drive-out conveyors include accumulation options to maintain throughput with zone controlled package spacing to prevent product damage.

BestReach Rigid Belt Conveyors

Designed to service 53' and pup trailers, this conveyor easily powers in and out with no operator effort.

BestReach Rigid Roller Conveyors

Similar to the belt conveyor, this rigid roller is specifically designed with accumulation options for a single operator to float across multiple dock doors to maintain efficiencies.

PROVIDERS
OF THE BEST
QUALITY IN
EVERY MARKET
WE SERVE

BestConnect is the newest brand in the FMH Conveyors portfolio. Initially designed for e-commerce applications, it is easily reconfigurable to meet current or future needs. By connecting flexible and rigid products together, shipping, receiving and manual sortation becomes faster and more efficient. The BestConnect system is ideal for startup operations or facilities needing increased capacity during seasonal peaks.

The BestConnect System

Each section of the BestConnect system is designed on casters for easy portability. Depending on the application, sections can be used independently or as a complete system by easily attaching multiple units together. The BestConnect system can also be added to existing conveyor configurations with a standard 120VAC power connection.

MOST
INNOVATIVE
AND RELIABLE
ENGINEERED
EQUIPMENT

Our FMH Care program protects the life of your equipment as it experiences normal wear and tear. With FMH Care, you will experience improved system reliability, long-term use and peace of mind. It is more than an investment in your equipment purchase; it is a partnership.

Our commitment is to provide quality products and superior service. It is our goal to exceed customers' expectations and build trusting relationships because we CARE about you.

24/7/365 Technical Support

Day or night, our technical support staff is available to arrange for a technician to be on-site quickly in the unlikely event a conveyor goes down.

Field Service

Our technicians are strategically located throughout the US to assist with service calls that support your maintenance objectives — increase productivity, reduce running costs, and maximize equipment availability.

Replacement parts

It is critical to the success of your business to stock conveyor replacement parts. We recommend using genuine FMH Conveyors parts to protect your equipment and warranty.

Preventive Maintenance

FMH Conveyors manufactures durable and reliable products able to withstand the punishing conditions often associated with shipping and receiving. Our preventive maintenance program provides support throughout the entire life cycle of all your FMH Conveyors' products. Scheduled service calls by knowledgeable technicians, detailed system reports and equipment audits all prevent costly downtime.
